ATTN CPR FISHERMEN: Clarification to Rule 3.3 in Section III: If you are fishing CPR ONLY OVER 8 RODS on a tournament weekend you have to declare it on the radio when you start fishing to a boardmember or weighmaster. We had multiple reports of multiple guys running over 8 rods. CPR Only boats can absolutely do that. If you are fishing both CPR and weight, normal 8 rod rules apply. If guests are on board, you have to get guest memberships prior to fishing. You can declare CPR daily. For example; full tournament Saturday 8 rods and members on board(no action required), fishing CPR only Sunday with more than 8 rods (must declare before fishing). This is tournament weekends only and only if you are fishing CPR with more than 8 rods on any day.

FOR MONTHLY TOURNAMENTS, THERE WILL BE A 6PM FRIDAY CUT OFF FOR BOATS ENTERING INTO THE SIDE BETS. GUESTS CAN BE ENTERED THROUGH THE WEEKEND BY INFORMING THE WEIGH MASTER OR A BOARD MEMBER. YOU MUST SHOW A COPY OF YOUR RECIEPT TO THE WEIGHMASTER IF YOU ARE A LATE ENTRY OR GUEST. IF THE GUEST HAS NOT PAID, THEY MUST IMMEDIATELY PAY THE WEIGHMASTER BEFORE ANY FISH IS WEIGHED IN. ALL GUESTS MUST PAY AT DINNER IF THEY DO NOT WEIGH A FISH.

A Notice from the Board

Greetings to all M.O.M.C. members. As we get ready to start another muskie season, we have some pressing issues for our great lake, Lake St Clair. As we are all well aware, the lake has been accepting raw sewage due to the 15 mile sink hole. We invite our members to think about ways to help our lake. The Macomb County Public Works is now run by Candice Miller. She has been an advocate for our Lake as she is a resident. If there is anything you can do to help in cleaning up our lake, please contact her at the following;

Candice S. Miller

Public Works Commissioner

21777 Dunham Road Clinton Township, MI 48036

Phone: 586-469-5325

Fax: 586-469-5933

Email: Public.Works@macombgov.org

We are not looking for our members to just complain. We are looking for help in a resolution to clean up our lake from Michigan to Canada. If in Canada, please contact Ontario Clean Water Agency;

Toronto

One Yonge Street, Suite 1700

Toronto ON M5E 1E5

Telephone: [416-775-0500](tel:416-775-0500) | [1-800-667-6292](tel:1-800-667-6292)

Email: ocwa@ocwa.com

We must protect our resource.

We also want people to be aware of the VHS Virus that reared its ugly head on our lake again this spring. Please be very cautious when handling muskie this season as they may be in a weakening state. Please help the DNR in maintaining a clean environment on a personal level. This includes bait transfer, bilge water, and trailering of your boat. Create a clean fishing environment when doing these things. You can learn more here:

http://www.michigan.gov/dnr/0,4570,7-153-10364_52259_10950_46202-213926--,00.html

Thank You, MOMC Board of Directors

NOTICE

RIP Tod Alan Stanton

Beloved husband of Becky. Loving father Jeff (Maggie), Amy (Stew) Schumacher, and Keith (Missy). Dear grandfather of Alexa, Luke, Nate, and Sawyer. Dear brother of Steve and Laura (Deb). Many nieces and nephews. He loved the outdoors. He was an avid sportsman and fisherman. He also enjoyed golf and spending time with his family. Tod was the President of the MOMC and created the MOMC Youth Derby. Tod, thank you for the leadership and guidance. You will be missed on Lake St Clair and in the community.

We would like to start a club directory of the businesses our club members own and classifieds. This will be a great service to provide answers to questions you have, services you need, and a name you can recognize. We will include Charters, Lure makers, Landscapers, home builders, electricians, boat repair, marinas, ETC. If you would like your service listed on a classified ad, please send your information to Woody at murdoc9595@comcast.net

CLUB Notes

Please be advised, the club's address is:

21817 Bon Heur St.

St Clair Shores, MI 48081

Please email pictures and label them to be included in yearbook (name, boat, size of fish) DIRECTOR@LSCMOMC.COM

We will have all store inventory on sale at the next meeting. We will be selling new MOMC gear!

Update your email address with us so you get a newsletter by emailing DIRECTOR@LSCMOMC.COM

PLEASE CONTACT A DIRECTOR IF YOU HAVE NEWS TO SHARE OR EMAIL
MURDOC9595@COMCAST.NET

Members with Guests must notify a MOMC board member (President, VP Secretary, Treasurer or weigh master) or Registered on PayPal should be paid (if possible) before 8:00 a.m Saturday for the monthly derby.

You can follow club activities, standings, and photos on the Michigan Ontario Muskie Club Facebook page.

**** No Minimum Length in CPR ****

Please include the number for the weekend and 2017 in your picture. No transfer of fish from boat to boat for measuring purposes.

Join the club online through Paypal

Let um Go, Let um Grow...

Michigan Corner

MUTE SWAN AN AGGRESSIVE INVASIVE

It might look like your average Michigan swan, well it's not! Mute Swan can often be perceived as native swan. The most noticeable feature which distinguishes the species from native swan species; has to be beak appearance. Trumpeter Swan usually have black beaks, while adult male Mute Swan has an orange beak. Michigan swan are generally louder than the invasive species, and have differently shaped necks. These invasive organisms are native to Europe, and were introduced to Michigan in 1919. As Mute Swan were introduced to the US environment, they brought along with them their aggressive behaviors and diets. Read on to learn more about their aggressive tendencies.

Mute Swan have been known to degrade the vegetation of our natural areas. The invasive diet is not a sustainable component of the interacting ecosystems. Mute Swans feed on the roots of plants and diminishes the vegetation before it has enough time to replenish in the environment. Since Mute Swan has been introduced, they reproduce at alarming rates and easily proliferates around our Great Lakes, wetlands, state parks, inundated environments, and other coastal areas in Michigan. The species also depends on plant based diets in the growing season, which could be crucial to plant propagation for that year. Michigan's environments can be especially vulnerable to degradation of its plant resources, and this will make food resources scarce and create more competition for resources amongst native organisms. Experiments concluded that these waterfowl can eat up to 8 pounds of vegetation for metabolic processes and food energy.

Mute Swan live long lasting lives and have fast reproductive rates. For example; a Mute Swan of Rhode Island is dated to be 26 years of age. With these characteristics of the Mute Swan population in effect, they can successfully increase their population densities of Michigan territories. Mute Swan pose more of a threat to northern Michigan counties, but they are appearing in southern Michigan counties. Their proliferation in native niches increases their chances for survival while decreasing native organism's fitness in Michigan. Proper management of the Mute Swans species is critical to conserving the intrinsic value of Michigan's resources.

Mute Swans create competition amongst native swans such as ; Black tern, Trumpeter Swans, Common Loons, and other local birds. Habitat destruction, interspecific competition, and human harm are few of many problems which Mute Swan introduces to Michigan. This invasive swan has also been known to aggressively attack humans. Humans can be vulnerable to aggressive attacks if they come within a range too close to Mute Swan nests and eggs. Mute Swan have been known to attack if these areas are threatened or approached. Next time you observe a flock of swan, be sure to search for some key characteristics to help distinguish the species. Mute Swan proliferation rates are increasing, and these invaders should not be competing for resources of our native swan. Awareness of the species will contribute to Michigan's efforts to eliminate the species and conserve our beautiful habitats from destruction!

This article is part of the ongoing series on invasive species funded in part with funds from the Michigan Invasive Species Grant Program through the Departments of Natural Resources, Environmental Quality, and Agriculture and Rural Development

Club Member News

Congratulations to Team Producer, Team Fins N Grins, and Team Hot Shot for running the table at The Bash on July 23rd.

This one's for you Big Vic!

Nice fish Teeko for year end

PLEASE, if you have news to share about club members, let a director know or email Woody @ murdoc9595@comcast.net

Update your email address with the club so you are receiving monthly newsletters!

Nice Tiger Mr Muskie!

Bill Maertens 40lb Derby & Summer Slam

The August Derby is in the books. This is always a great event as we run it in coordination with the Walt Sadowski Memorial Muskie Tournament out of Mr Biggs Restaurant in Belle River Ontario. Our Weighmaster, Lance Koester, gets to sow his Canadian heritage during the weekend and runs the weigh station from the great country to the north. Thank you Lance and thank you Tim Price for running Walt's Tournament.

The weather for the year has been questionable to say the least. This weekend didn't change my mind. Winds blew across the lake and made all the Canadian side fishermen work for their keep. The Sunday weather was better and fish came in both days.

Thank you to Tom's Gas Dock for hosting dinner and thank you to the entire Smith Family for supplying it (Family Tradition). It is always a challenge for our board to coordinate this event considering the Canadian regulations. The Smith family really stepped up this weekend. The pulled pork BBQ was great. Thank you to Brad Smith and Lance Koester for chairing the event.

The results:

1st Place Chris Michayluk TEEKO 49 ½" 33.15 lb

2nd Place Carl Reams CALI COLE 51 ½" 32.50 lbs

3rd Place Denis Andean Liquid Sedation 49 3/8" 32.40 lbs

CPR 52" Family Tradition Scott Smith

Youth Registered Release

Ship It Marco Ramirez 51"

Family Tradition Ian Smith

We did have Scott Smith take 2nd place in the Biggs Tournament with a 52" fish. Congrats Scott!

More From Bill Maertens 40lb Derby & Summer Slam

Follow up from Special Olympics Derby

We wanted to give an update to the Special Olympics Tournament. Please be proud to be part of the 22nd Annual Special Olympics Derby that benefited our local chapter, Grosse Pointe/Harper Woods Community. We donated **over \$14,000** this year. Thank you prime sponsors, boat sponsors, captain's, and Crews. We also want to thank **Michele Penoyer** from the GPYC for photographing the event. Great news from the Detroit Tigers, they **donated 25 tickets** to the chapter for a great night out for the athletes and their families!

Heart Attack: First Aid

We are in the beginning stages of organizing a certified CPR and First Aid class that is American Heart Assoc. approved this Spring. We will keep you abreast of the time and date. This will count for USCG captain requirements and healthcare worker requirements.

[By Mayo Clinic Staff](#)

Someone having a heart attack may experience any or all of the following:

- Uncomfortable pressure, fullness or squeezing pain in the center of the chest
- Discomfort or pain spreading beyond the chest to the shoulders, neck, jaw, teeth, or one or both arms, or occasionally upper abdomen
- Shortness of breath
- Lightheadedness, dizziness, fainting
- Sweating
- Nausea
- A heart attack generally causes chest pain for more than 15 minutes, but it can also have no symptoms at all. Many people who experience a heart attack have warning signs hours, days or weeks in advance.

What to do if you or someone else may be having a heart attack

- **Call 911 or your local medical emergency number.** Don't ignore or attempt to tough out the symptoms of a heart attack for more than five minutes. If you don't have access to emergency medical services, have a neighbor or a friend drive you to the nearest hospital. Drive yourself only as a last resort, and realize that it places you and others at risk when you drive under these circumstances.
- **Chew and swallow an aspirin,** unless you are allergic to aspirin or have been told by your doctor never to take aspirin. But seek emergency help first, such as calling 911.
- **Take nitroglycerin,** if prescribed. If you think you're having a heart attack and your doctor has previously prescribed nitroglycerin for you, take it as directed. Do not take anyone else's nitroglycerin, because that could put you in more danger.
- **Begin CPR if the person is unconscious.** If you're with a person who might be having a heart attack and he or she is unconscious, tell the 911 dispatcher or another emergency medical specialist. You may be advised to begin cardiopulmonary resuscitation (CPR). If you haven't received CPR training, doctors recommend skipping mouth-to-mouth rescue breathing and performing only chest compressions (about 100 per minute). The dispatcher can instruct you in the proper procedures until help arrives.
- **If an automated external defibrillator (AED) is available** and the person is unconscious, begin CPR while the device is retrieved and set up. Attach the device and follow instructions that will be provided by the AED after it has evaluated the person's condition.

ATTENTION ANGLERS: NEW MUSKELLUNGE STUDY

DNR Lake St. Clair Fisheries Research Station and Lake Erie Management Unit

May 2016

Help needed for Muskellunge tagging study

In order to understand the movements and behavior of Muskellunge and their associated fishery within the St. Clair-Detroit River System the Michigan Department of Natural Resources is launching a new study. The first step for this study begins this spring when a small number of Muskies (~20) will be tagged during the DNR's annual spring egg take in the Detroit River. Each fish will receive an internal acoustic tag which is automatically detected by listening stations deployed throughout the region. An **ORANGE** external FLOY tag will also be attached below the dorsal fin (see photos below). If you catch a tagged Muskie and plan to release it: please **DO NOT** remove the tag. Please record the tag number and contact Jan-Michael Hessenauer at (586) 465-4771 ext 35 or email: hessenauerj1@michigan.gov. If you harvest a tagged Muskie please remove the acoustic tag (approximate location shown below) and report the tag as per above. Reporting of tagged fish is greatly appreciated and will maximize the benefit of this study to the management of fisheries in the St. Clair-Detroit River System. Thank you!

If you catch a tagged Muskie
and plan to release it:

-Please DO NOT remove the tag

Please Record:

-The tag number

-Location of capture

-Time of capture

Call / Email:

Jan-Michael Hessenauer

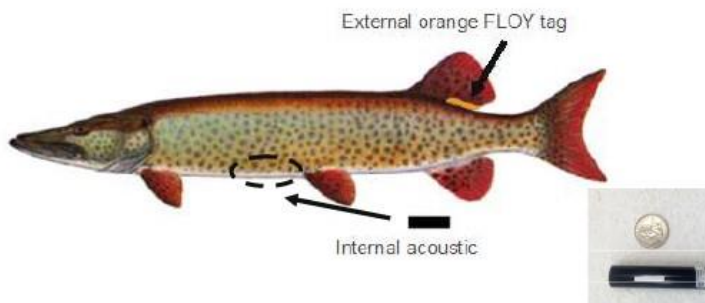

Michigan DNR

(586) 465-4771 ext 35

Keep the Lake Clean

Be a part of
the solution!

Eurasian Watermilfoil

Silver Carp

Aquatic Hitchhikers

Volunteer cleaning boat propeller
Ann Arbor

Invasive aquatic animals and plants are spreading at alarming rates by hitching rides with anglers and boaters. Whenever boaters leave a body of water without cleaning their recreational equipment, they may be transporting one of these harmful creatures from one lake or stream to another. A few invasive species are highlighted in this brochure.

ROUND GOBIES are bottom-dwelling fish that compete with native fish, like sculpins and log perch. They're also aggressive egg predators – feeding on the eggs of other fish, such as smallmouth bass and walleye, contributing to the potential decline of many valuable sport fish populations.

Round Goby

ASIAN CARP, including the high-jumping silver carp and the voracious bighead carp, pose a serious threat to native species.

Canals and other connections to the Mississippi River Basin could allow Asian carp into the Great Lakes. Boaters and anglers can do their part to avoid accidentally transporting carp eggs, larvae, and young in bilge water, livewells or bait buckets.

Silver Carp

ZEBRA and QUAGGA MUSSELS feed extensively on algae and plankton, thereby disrupting the delicate balance of the entire aquatic ecosystem.

Just because they make the water clearer by eating plankton doesn't mean they're good for lakes! In addition to changing the food web, the filter-feeding invasives build up contaminants in their bodies, which in turn, exposes other animals to higher levels of contaminants. They have been known to attach onto and kill native species of mussels. While zebra mussels can colonize any hard object, quagga mussels are far more versatile. They can live in colder, deeper water and thrive on a sandy lake bottom.

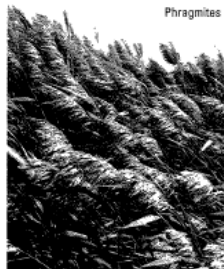

Quagga mussel

Zebra mussel

EURASIAN WATERMILFOIL, PHRAGMITES AUSTRALIS and PURPLE LOOSESTRIFE are invasive aquatic plants that also endanger our waters and wetlands. While they may look harmless, these plants can crowd out native plants and take over large areas quickly. Milfoil, a submerged plant, often gets wrapped around boat propellers. It's important to clean plants like Eurasian watermilfoil off of your boat and trailer because they can reproduce in new areas from a strand as little as two inches long.

Phragmites

Found Something Strange?

The Great Lakes Aquatic Non-indigenous Species Information System (GLANSIS) website is your one-stop portal for Great Lakes invaders. If you find an invasive species while boating or fishing, check GLANSIS first for:

- Identification information to verify if it is a native or non-native species.
- Fact sheets about invasive species impacts.
- Collection details: has this species been documented before in this body of water?
- Link to a reporting form to help scientists track the spread of aquatic non-native species.
- GLANSIS:

Classifieds

I have 3 rod/reel combos and a collection of lures for sale, and was wondering if anyone in your club would be interested. Two combos are high-quality med-hvy 7' and a 7'-6" heavy action rods with Abu Garcia Model C4-6501 and C4-6601 reels (left-hand retrieve). Both are like new. I also have a heavy action 6' rod that I bought for trolling, but I've never used it. Good selection of lures in excellent condition—bucktails, cowgirls, topwaters, diving minnow-baits, and more. Also have a net that's just taking up space in my garage. Purchased all this gear and hardly used it. Would like to see it land in the hands of an avid musky angler or two. If not, I'm going to put it in my garage sale this summer.
